

**My Mosler Biography:**

**Laura Armour** – I worked at Mosler from May of 1987 until August of 2001. I started as an Area Administrator working for Pete Devlin and Doug Moore out of the San Francisco Branch. I moved on to a Service Coordinator position and then in 1997, I was asked by Peter McInerney to be the Western Region Point person during the S2000 field implementation.

After implementation, I went on to work for Chester Millay as the S2000 Field Systems Administrator during which time, I traveled to Hamilton on a frequent basis to conduct training for Branch Managers and Customer Service Coordinators.

Currently, I reside in San Jose CA with my husband Art (who also worked for Mosler) and our two cats. I hold the position of Client Services Manager at RFI Communications and Security Systems and in my spare time, I volunteer as an Assistant Regional VP for Region 1C of ASIS International.

I consider myself lucky to have had the opportunity to meet so many employees from across the organization during my time at Mosler and I'm grateful for the everlasting friendships. No matter where you travel within the industry, you are sure to run into someone who used to work for Mosler.
